## Bill Form Definitions

**Service Charge:** A fixed monthly charge related to metering, billing and account maintenance.

**Distribution Charges (Gas):** Charges related to delivering gas through pipes from supply sources to the customer. These charges include a term component, and in November through March on certain rate schedules, also include a demand component.

## Bill Form Definitions (continued)

**Balancing Charge (Gas):** This charge reflects storage related costs associated with winter gas use. This charge is only applicable in the billing months of November through March.

**Demand (Gas):** The highest average daily use of gas over the most recent billing months of November to March.

**Supply (Gas):** Charges for customers who do not choose a competitive gas supplier are called Basic Gas Supply Service (BGSS). The charges include the cost of the natural gas as well as the cost of interstate delivery of the gas to New Jersey.

**Distribution Charges (Electric):** Charges related to delivering electricity through wires from supply sources to the customer. These charges include both kilowatthour (kWh) and demand (kW) components.

**Measured Demand (Electric):** The maximum use of electricity at any time during a month or monthly time period (on or off-peak).

### Annual Demand (Electric):

(For Rate HTS): The highest Measured Demand over the most recent 12 months.

(For Rates MD, ED, LPLS, LPLP): The highest Measured Demand in any time period in the current month.

**Summer Demand (Electric):** The Measured Demand (excluding off-peak) in each billing month of June through September.

**Societal Benefits:** This charge recovers the cost of government mandated programs designed to achieve public policy goals, such as energy conservation.

**Securitization Transition:** This charge recovers costs and associated taxes for transition bonds and for BGS transition bonds collected by PSE&G as servicer on behalf of PSE&G Transition Funding LLC and PSE&G Transition Funding II LLC, respectively.

**Supply Capacity (Electric):** A customer's share of the generation and transmission facilities, measured in kilowatts (kW), which must be procured to serve the system annual peak usage. The customer's share is calculated from the customer's peak usage in the prior year's summer. For new customers without prior summer usage the share is calculated from connected load.

**Supply (Electric):** Charges for customers who do not choose a competitive electric supplier are called Basic Generation Service (BGS). The charges include the energy as well as the generation and transmission facilities necessary to produce and transmit the energy.
