

STEAM Day

S.T.E.A.M. (Science, Technology, Engineering, Arts & Math) Day is a full day of scientific presentations and experiments presented to our K-3 students. The presentations are well received by the children and their teachers and this is one of the most anticipated events in the spring. Over 50 different speakers and over 40 parent volunteers work together to make the full day of science a huge success and a great learning experience. Participants present a 35 - 40-minute, hands-on presentation that is appropriate for students in our kindergarten through third grades. Presenters complete experiments in any S.T.E.A.M (Science, Technology, Engineering, the Arts & Math) field at a K-3 grade level. Presenters come from local schools, local universities such as Rider and Princeton, corporations, NASA, FAA, US Department of Energy, wildlife preserves, NJDEP, etc.
