September 2019

Dear Parents and Guardians:

The West Windsor Plainsboro Regional School District is committed to providing safe schools for all students and employees in our district.

WW-P employed the services of a professional asbestos management firm, and the firm completed a detailed study to determine the presence, location, and quantity of asbestos-containing materials in all district facilities. Before the start of the school year, all school facilities were inspected in accordance with the Environmental Protection Agency guidelines for asbestos-containing materials. This report and study, as well as all historic data regarding asbestos, are available for your review in the main office of each school building.

A safe learning environment is paramount for the success of students and teachers. Please know that we will continue to follow all federal and state regulations concerning asbestos management.

Sincerely,

Thomas Daly
Director, Buildings and Grounds
