

West Windsor-Plainsboro Regional School District Concert Choir Grade 10-12

Unit 1: Rehearsal Technique

Content Area: Music

Course & Grade Level: Concert Choir, Grade 10-12

Summary & Rationale

Music is an academic subject with its own special body of knowledge, skills, and unique way of knowing and thinking. It is an integral part of other curricular areas. Music creates a bridge between the school and the community. Musicianship is knowledge-based and is developed through practicing, critical listening, performing, and creating. Music fosters creative growth as well as develops self-confidence and self-discipline. This creative art form allows use of the whole brain and promotes self-expression through performance, composition, and/or the use of technology. It provides many opportunities for all students, at all levels and abilities, to participate and excel while building teamwork. By helping our students to develop their musical abilities in ensemble and solo settings, we are helping to provide them with skills that also encourage lifelong learning.

This course offers students the opportunity to explore the mechanics and skills of becoming both a musician and a connoisseur of music. By learning how to carry themselves as a musician and work as a team in creative endeavors, students will develop the necessary skills and abilities to become life-long music enthusiasts and broaden their perspectives.

This course is written in four units to maintain consistency with other courses; however, the three units are actually intertwined and cannot be separated during instruction. It is more accurate to take the learning objectives, questions and understandings of each unit as learning that occurs on a regular basis at all times during the course.

They will be asked to make objective judgments forcing them to decide what is "good" music, responding with a music vocabulary and an understanding of the creative process. The skills students learn in this course will prepare them for future courses in the visual and performing arts as well as other content areas.

Evaluation of student work will be done by the instructor as well as, in some instances, by fellow students. Students will be asked to create with and present for their peers and will be graded on how well they meet the specific criteria of that exercise. Most of the assignments and projects are performance based; therefore, preparation and delivery are equally weighed when distributing grades. Finally classroom participation is critical to the productivity of the course and is also included in all grading and evaluations

It provides many opportunities for all students, at all levels and abilities, to participate and excel while building teamwork. By helping our students to develop their musical abilities in ensemble and solo settings, we are helping to provide them with skills that also encourage lifelong learning.

This course offers students the opportunity to explore the mechanics and skills of becoming both a musician and a connoisseur of music. By learning how to carry themselves as a musician and work as a team in creative endeavors, students will develop the necessary skills and abilities to become life-long music enthusiasts and broaden their perspectives.

This course is written in four units to maintain consistency with other courses; however, the three units are actually intertwined and cannot be separated during instruction. It is more accurate to take the learning objectives, questions and understandings of each unit as learning that occurs on a regular basis at all times during the course.

They will be asked to make objective judgments forcing them to decide what is "good" music, responding with a music vocabulary and an understanding of the creative process. The skills students learn in this course will prepare them for future courses in the visual and performing arts as well as other content areas.

Evaluation of student work will be done by the instructor as well as, in some instances, by fellow students. Students will be asked to create with and present for their peers and will be graded on how well they meet the specific criteria of that exercise. Most of the assignments and projects are performance based; therefore, preparation and delivery are equally weighed when distributing grades. Finally classroom participation is critical to the productivity of the course and is also included in all grading and evaluations.
